Art Unit: 1711

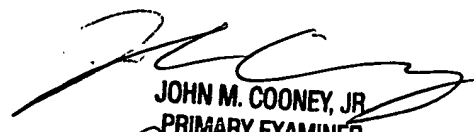

The following is an examiner's statement of reasons for allowance: Rejections are overcome in light of further consideration made during appeal conference. Upon further consideration it is held that appellants' disclosure, as demonstrated in their Appeal Brief, adequately supports the invention now claimed. Upon further consideration it is held that the additional fire retardant component of the primary, EP-0005903, reference is excluded by the "consisting of" language of appellants' claims, and removal of the required fire retardant from EP-0005903 would destroy the teachings of this reference. Additionally, upon further consideration it is agreed that the combination of references fails in that the secondary teaching, Plummer et al., requires employment of minispheres along with their disclosed microspheres and there is no motivation to only add the hollow microspheres from the processes of Plummer et al. to the processes of EP-0005903. The "consisting of" language of appellants' claims excludes these additionally required minispheres of Plummer et al..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
